Origin	Issue area	Comment	Response
Romania	Annexes	We propose that the information included in <i>Annex 12: Method to verify the presence of perfluorinated substances</i> and <i>Annex 13: Methods for analyses of PFOS and its related substances and their limitations</i> be transferred in the Draft guidance on sampling, screening and analysis of persistent organic pollutants in products and articles (2013) and if the case adjusted/complemented.	Agreed. This avoids duplicity of information
